

WorldVest Announces Third Quarter Financial Results

Furtheres Infrastructure Investment and Operations Development in Brazil and Asia

LOS ANGELES, CA November 27, 2009 – WorldVest, Inc. (OTCBB: WOVT), a global merchant bank, announced today its financial results, during its development stage, for its fiscal 2009 third quarter ending September 30, 2009. The Company posted revenue of \$9,051 and a net quarterly loss of \$721,524, or \$0.01 per diluted share. These results contribute to revenue of \$36,371 and a net loss of \$1,389,495 for the nine months ending September 30, 2009. WorldVest anticipates a significant revenue increase through the final quarter of 2009 continuing into 2010 as it exits development stage with the launch of its subsidiary, WorldVest Brasil, Ltda.

During the June 2009 launch of WorldVest, Inc., through a consolidation of Merchant Banking Assets into Catalyst Ventures Incorporated, we had to account for this consolidating transaction by adopting related party GAAP accounting rules governing business combinations. As a result of these accounting rules the \$6 million of convertible debentures issued by WorldVest to its parent company in exchange for the assets was treated as dividend and recorded as an additional deficit accumulated during development stage. In “as-if pooling-of-interests” accounting, financial statements of the previously separate companies for periods under common control prior to the combination are restated on a combined basis to furnish comparative information while assuming \$6 Million of convertible debentures and other various related party debts. The final effects of any acquired or market value for assets or subsidiaries acquired through our business consolidation will not be reflected on our company balance sheet. At this time management believes that the Global Merchant Banking infrastructure assets and subsidiaries acquired from a related party has tremendous present and future value not currently reflected on our balance sheet.

WorldVest Chairman and CEO, Garrett K. Krause, commented, “It is important to understand that WorldVest was launched in June of 2009, through a consolidation of assets from its parent company and as such we are still considered a development stage entity. At this time I am extremely pleased with the progress we have made and the potential value through our continued investment and development of our Global Merchant Banking infrastructure both in Brazil and Asia.” Krause continued, “there are no shortcuts or discounts when entering new emerging markets, yet I am entirely confident that the continued investment into these markets will pay shareholder dividends for years to come. In particular, our recent efforts to establish WorldVest operations in the highly profitable yet underserved banking and finance market within Brazil have positioned us to begin deploying capital through a variety of channels beginning in the first half of 2010.”

WorldVest's greatest asset has always been its human capital and network of global relationships, which have afforded the company a unique level of access to some of the most desirable emerging growth markets. Notable examples of the impact of such relationships include the Company's access to Brazilian retailers, its investment MOU with the Korea Trade and Investment Promotion Agency, and its banking and advisory license in the People's Republic of China. Through this global infrastructure, WorldVest seeks to capitalize on synergies existing between Brazil, Korea, and China to identify and pursue opportunities, which offer the greatest potential to create significant revenues in the pursuit of creating shareholders value.

About WorldVest:

WorldVest is a global merchant bank that offers not only traditional investment banking, asset management and advisory services, but also makes direct investments as a principal in select high-growth transactions on a global basis. Recognizing the disconnect that exists between the needs of companies and the limitations of traditional investment banking, private equity, and venture capital institutions, WorldVest seeks to set a new standard, emerging as a partner and solution provider where one did not previously exist.
